ARTIFICIAL INTELLIGENCE DOC PROJECT

BROUGHT TO YOU BY:

ZANDER BORRELLI AND SHAYDEN SLOAN

A BRIEF INTRODUCTION

- The "AI Documentary: or How I became an Apocaloptamist", what could it be?
  - A project created by Daniel Roher and Charlie Tyrell
  - Dives into the thoughts and emotions about Artificial Intelligence in the near future. It is a quest to find out whether we should be scared or excited for the future of AI.
  - Discussed various questions such as "Is it a good time to have a child?", "Will AI bring a sort of doomsday upon us?" Etc.
- Meaning of "Apocaloptamist"?
  - A person or being that expects a major crisis or event, but can still remain positive about the future.

INTERVIEWS

- Who is Featured as interviews in the Ai Documentary?

Name	Where they work	Position
Shane Legg	Google Deepmind	Co-founder and Chief AGI Scientist
Eliezer Yudkowsky	Machine Intelligence Research Institute	Co-founder; longtime AI risk theorist
Deborah Raji	UC Berkeley	Researcher focused on algorithmic auditing and accountability
Nitasha Tiku	The Washington Post	Tech culture reporter
Peter Diamandis	XPRIZE & Singularity University	Founder & Chair

SHANE LEGG

- Shane Legg is the co-founder of the AI lab DeepMind.
- He earned his PhD at the Dalle Molle Institute for Artificial Intelligence Research. (IDSIA)
- At DeepMind, Legg contributed to the company's mission of developing AGI to address complex global challenges.
- The company gained recognition for its work in deep reinforcement learning, enabling AI systems to learn from experience and solve complex problems, such as playing Atari at unnatural levels.
- In his role as co-founder and chief AGI scientist at Google DeepMind, Legg leads the technical AGI safety team.
- He is known for his public advocacy regarding existential risk from AI and has signed statements highlighting the importance of AI safety.

SHANE LEGG (CONTINUED)

- Legg's work in artificial intelligence has been recognized with several honors.
- He was appointed Commander of the Order of the British Empire (CBE).
- He has received the Digital Masters Award for Excellence in Technology.
- Legg has presented at venues including TED AI and Oxford Martin School, addressing critical issues in AI research, AGI development, and AI safety.
- Shane is more worried about Artificial Intelligence and its danger.
- "Eventually, I think human extinction will probably occur, and technology will likely play a part in this. But there's a big difference between this being within a year of something like human level AI, and within a million years. As for the former meaning...I don't know. Maybe 5%, maybe 50%. I don't think anybody has a good estimate of this."

ELIZER YUDKOWSKY

- Elizer Yudkowsky is a founding researcher and co-founder of the Machine Intelligence Research Institute
- Helped to introduce the topic of AI extinction risk to mainstream audiences such as X (Formerly known as twitter), TikTok, Youtube, and more
- Elizer also contributed chapters to the academic anthologies ,The Cambridge Handbook of Artificial Intelligence and Global Catastrophic Risks.

Photo of Elizer Yudkowsky from the Machine Intelligence Research Institute website

ELIZER YUDKOWSKY (CONT)

- Despite never attending a college or high school, Yudkowsky became one of the founders of the field of AI Alignment
- Founded the Community Blog "LessWrong" in 2009, where he has written hundreds of articles on the dangers of Artificial Intelligence
- He has made a multitude of major plays, including: Giving his own TED Talk, proposed a variety of actions to limit the power of Artificial Intelligence. Methods such as a proposal to let the Government “destroy a rogue datacenter by airstrike.”
- Elizer Yudkowsky is definitely worried about the future with Artificial Intelligence

DEBORAH RAJI

- Raji is a researcher and advocate dedicated to addressing the bias of Artificial Intelligence.
- Her work focuses on the social implications of AI, ensuring ethical practices in AI development
- Deborah Raji is also a member of the Mozilla foundation. She collaborates with others at the foundation to improve the transparency and accountability of AI
- She has also worked with the "Algorithmic Justice League", where she contributed groundbreaking research on facial recognition technologies and their impacts on marginalized communities.

Photo of Deborah Raji from Simons Institute for the Theory of Computing

DEBORAH RAJI (CONT)

- Deborah Is an Advisory Board Member for the Center for Democracy and Technology AI Governance Lab, the Health AI Partnership, REALML and the Center for Civil Rights and Technology
- Because of this, she was named to a multitude of titles, those including: Forbes 30 Under 30, MIT Tech Review 35 Under 35 Innovators and the TIME 100 Most Influential in AI.
- Overall Her stance on Artificial Intelligence is more on the worried side of the dangers of artificial intelligence.
- "Let's say I want examples of what healthy skin looks like. If you Google it now, you will see mostly light-skinned women," says Raji. "You won't see a man for pages, and you wouldn't see a darker-skinned woman until you really scroll down. If you feed that into an AI model, it adopts this world view and adapts its decisions based on those biases."

NITASHA TIKU

- Tiku earned a Bachelor of Arts in English from Columbia University and a Master of Arts in Journalism from New York University.
- She has spent over a decade covering Silicon Valley and technology culture, working as a senior writer for *WIRED* .
- Also a staff writer for *BuzzFeed News*, *The Verge*, *Valleywag*, and *NYmag.com*.
- Tiku is a Tech Culture Reporter at *The Washington Post* in San Frandisco.

NITASHA TIKU (CONT)

- Tiku investigates how artificial intelligence impacts society and human behavior, while also researching policies around it and what industries do with it.
- Spearheaded extensive journalistic coverage tracking how Silicon Valley trends—such as generative AI and AI companions effect human relationships and consumer psychology.
- She tend to look upon ai with a skeptical and concerned eye as opposed to an optimistic one.

PETER DIAMANDIS

- Diamandis is the founder and executive chairman of XPRIZE
- Has launched over $600 Million in competitions driving more than $10 billion in research and development across space, health, robotics, climate, quantum and AI.
- Co-Founded Singularity University, Ling Exponential Adventures, and BOLD Adventures
- Diamandis was named by as one of the World's 50 Greatest Leaders
- He is also a New York Times best Selling Author

PETER DIAMANDIS (CONT)

- Has earned Degrees in Molecular Genetics and Aerospace Engineering
- Diamandis also holds an M.D from Harvard Medical School
- Takes a positive stance on Artificial Intelligence

COMPARISON

Name	Shane Legg	Elizer Yudkowsky	Deborah Raji	Nitasha Tiku	Peter Diamandis
Where do they agree	Artificial intelligence can bring unwanted danger	Artificial Intelligence and AI technology could bring the end of the world	Skeptical on the safety and integrity of AI	Skeptical on The safety of Artificial Intelligence	Believes that Artificial Intelligence will change the future for the better
Where do they disagree	Overall Safety of AI	Overall Safety of AI	Overall Safety of AI	Overall Safety of AI	Ai will be a dangerous tool

GROUP REFLECTION

- After studying these five people, we are more hopeful towards the future of Artificial Intelligence. We have faith that these big people and companies will keep the AI under control and can be a very helpful tool.
